RELEASE NOTES GreenRADIUS UPDATE v5.2.11.11

RELEASE DATE
SEPTEMBER 30, 2024

NOTES

- a. This GreenRADIUS update can only be applied to v5.1.1.1 or later.
- b. A minimum of 4GB RAM is recommended for this update to be applied successfully.
- c. Before applying updates, we recommend creating a snapshot of the GreenRADIUS VM in your virtualization server environment that can act as a backup.
- d. The update process may take about 10 to 15 minutes, and processing of authentication requests may be affected for some time during this process.

VULNERABILITIES PATCHED

- 1. USN-6986-1 OpenSSL vulnerability
- 2. USN-6993-1 Vim vulnerabilities
- 3. USN-7002-1 Setuptools vulnerability
- 4. USN-7012-1 curl vulnerability
- 5. USN-7015-1 Python vulnerabilities
- 6. USN-7000-2 Expat vulnerabilities
- 7. USN-7029-1 Linux kernel vulnerabilities

STEPS TO APPLY THE UPDATE

- 1. Download the <u>GreenRADIUS update v5.2.11.11 zip file</u>
 (md5 = 90ac358e1d280a38485625ad08d1a483, sha256 =
 21516bdb343350b571fe0f4b51b3f3e9e133249adc957c2ab5f73ec420db8d32)
 Extract it, and it will result in a folder
 "GreenRADIUS_521111_Update"
- 2. Copy this folder onto the GreenRADIUS host in /home/gradmin using a client like scp or WinSCP
- 3. Log in to GreenRADIUS over ssh
- 4. Run the following commands:
 - a) \$ cd /home/gradmin/GreenRADIUS_521111_Update
 - b) \$ sudo chmod +x install_update.sh
 - c) \$ sudo sh install_update.sh
- 5. The system and application components will be updated. After a successful update, a prompt will be shown to reboot the system. Type "y" to reboot the system to complete the process.
- 6. After a successful update, it is recommended to clean up the new directory created for this update process.
 - a) \$ sudo rm -rf /home/gradmin/GreenRADIUS_521111_Update

ENHANCEMENTS, NEW FEATURES, AND BUG FIXES OVER GreenRADIUS v5.2.10.10

- Fixed an issue where single-factor could not be enabled/disabled for users when users were imported with "userPrincipalName" as the Login Name Identifier
- 2. Fixed a regression with the "Resynchronize" button which had caused only the first selected GreenRADIUS server to be re-synchronized even if multiple GreenRADIUS servers were selected
- 3. Fixed an issue that affected log rotation of certain modules which could result in high disk utilization over a long period of time
